# Terra Aquos

Cushioning and shear reduction for a smoother ride

A high performance anti-decubitus cushion with micro-shear protection, providing a simple long term solution for those at medium risk of pressure ulcers.

## Features

- Four LiquiCell® inserts for micro-shear reduction during natural movements and transfers
- Ottobock Rest Suspension foam technology:
  - Elastically modified for excellent pressure redistribution
  - Improved impact damping compared to standard foams
  - Consistent performance over time for reliable results
- Anatomically molded profile:
  - Redistribution of pressure away from the ischial tuberosities
  - Trochanter supports for pressure redistribution and postural stability
  - Medial and lateral support for thigh positioning

# Easy to apply and the benchmark in “new generation” cushions

## Benefits

- Controlled shear reduction in the ischial / thigh area during movement
- Excellent ride comfort
- High level postural stability for activities and transfers
- Excellent pressure redistribution across a broad range of clients
- Maintenance free

## Additional information

- Water-resistant Dartex® cover
- Cover washable between 40° and 60° (for further details, see instructions for use)
- Ring zip pull, and zip on three sides, for easy cover removal
- Additional inner incontinence barrier available
- Max. user weight: 150 kg
- Cushion weight: 1.2 kg (for 400 x 400 mm)

## Application

- For users who demand skin protection, shear reduction and require postural stability and support (e.g. spinal cord injuries, degenerative or other neurological conditions)

## Ideal for

- Users with medium risk of pressure ulcers, especially those that are vulnerable to shear forces (e.g. active users, hand or foot propellers)
- Users with poor sitting balance
- Users with discomfort or pain during mobility on uneven terrain or curb drops

4x LiquiCells® located in the ischial / upper thigh area
